

Alex Rivera — Senior AI Engineer Resume — Page 1

Candidate Summary

Senior Artificial Intelligence & Machine Learning Engineer with 6+ years of production experience architecting Retrieval-Augmented Generation (RAG) systems, multi-agent frameworks (LangGraph), vector databases (ChromaDB, Pinecone), and scalable LLM inference pipelines.

Core Technical Skills

- Languages: Python (Advanced), SQL, TypeScript, Bash
- AI/GenAI: LangChain, LangGraph, ChromaDB, Sentence-Transformers, HuggingFace, LlamaIndex, OpenAI, Anthropic, Groq, Gemini
- Machine Learning: PyTorch, Scikit-learn, HuggingFace Transformers, LoRA, QLoRA, Fine-Tuning
- Backend & Cloud: FastAPI, Docker, PostgreSQL, Redis, AWS (SageMaker, S3, ECS), Git CI/CD
- RAG Capabilities: Hybrid Retrieval (Vector + BM25), Reciprocal Rank Fusion, Chunking Optimization, Context Reranking

Professional Experience

- Staff AI Engineer at Cortex Labs (2022 - Present): Designed multi-document RAG assistant serving 200k+ daily queries with sub-250ms latency. Implemented LangGraph multi-agent workflows for autonomous data analytics.
- AI Research Engineer at DeepScale AI (2019 - 2022): Fine-tuned open-source LLMs using LoRA/QLoRA on specialized enterprise corpora. Developed hybrid BM25 + dense vector search pipeline.
